Office Action Summary

Application No.

09/942,784

Applicant(s)

KANG, TAE-WOONG

Examiner

Kin-Chan Chen

Art Unit

1765

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 May 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 20 is/are allowed.
- 6) ☒ Claim(s) 1-5, 11-15 and 17-19 is/are rejected.
- 7) ☒ Claim(s) 6-10 and 16 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Drawings

1. Figures 1A-1G should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. Fig. 1A-1G is a conventional art, see page 2, lines 11-12 as evidence.

Claim Rejections - 35 USC § 102

2. Claims 1, 5, 11, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by admitted prior art.

In a method for forming a capacitor of a semiconductor device, admitted prior art (conventional art) teaches that a first, second, and a third insulation layer may be formed sequentially on a semiconductor substrate (Fig. 1A). The third and the second insulation layer may be sequentially etched to form at least one hole over a first region of the semiconductor substrate (Fig. 1B). A conductive layer may be formed over the semiconductor substrate (Fig. 1C). CMP may be performed until an upper surface of the third insulation layer is exposed (Fig. 1E, page 2 of the specification, lines 8-10).

Portions of the third insulation layer may be removed from the first region (Fig. 1F and

1G). As to dependent claim 5, admitted prior art teaches said material (pages 2 of the specification, line 16).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-4, 17, and 19 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over admitted prior art.

In a method for forming a capacitor of a semiconductor device, admitted prior art (conventional art) teaches that a first, second, and a third insulation layer may be formed sequentially on a semiconductor substrate (Fig. 1A). The third and the second insulation layer may be sequentially etched to form at least one hole over a first region of the semiconductor substrate (Fig. 1B). A conductive layer may be formed over the semiconductor substrate (Fig. 1C). CMP may be performed until an upper surface of the third insulation layer is exposed (Fig. 1E, page 2 of the specification, lines 8-10). Portions of the third insulation layer may be removed from the first region (Fig. 1F and 1G).

Admitted prior art teaches the second insulation material may be silicon nitride and the third insulation material may be silicon oxide (pages 2 of the specification, line

Art Unit: 1765

20-23). Because same materials are used in the same process, it would inherently contain same etching properties (having different characteristic with respect to each other in instant claim 2) and same functions (produce non-sharp upper edges of the conductive layer in claims 17 and 19).

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art.

Admitted prior art does not explicitly state that the slurry material may be removed from the first region. However, it would have been obvious to one with ordinary skill in the art to clean (remove) the slurry in the device because it is conventional to keep the semiconductor device as clean as possible and remove unneeded material for the product during semiconductor device fabrication.

5. Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art in view of Matsuoka et al. (US 5,130,449; hereinafter " Matsuoka ").

The discussion of modified Matsuoka from above is repeated here.

Claim 13 differs from admitted prior art by specifying using wet etching for removing the insulation material over a conductive material. However, it is conventional to use wet etching method for removing the insulation material over a conductive material. Matsuoka is only relied on the show this conventional method (col. 12, lines 10-13). Because it is conventional and because it is disclosed by Matsuoka, hence, it would have been obvious to one with ordinary skill in the art to modify the method of admitted prior art by using wet etching method for removing the insulation material over

a conductive material in order to provide their art recognized advantages and produce an expected result.

As to dependent claims 14 and 15, Matsuoka is not particular about the wet station being used in the wet etching process. Hence, it would have been obvious to one with ordinary skill in the art to use wet station employing an IPA vapor drier because it is one of the most popular wet station for wet etching process.

Response to Arguments

6. Applicant's arguments filed May 27, 2003 have been fully considered but they are not persuasive.

Applicant has argued that there is no admission as to prior art. In response, in specification, page 2, lines 11-12, applicant clearly states that the processes steps of Fig. 1A-1G is conventional.

Allowable Subject Matter

7. Claim 20 is allowed.

Claims 6-10 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The references of record do not teach or suggest a method for forming a capacitor comprising: after etching, the thickness of the third insulation layer over the second region is thinner than a thickness of the third insulation layer over the first region (claim 6); or etching the hard mask film using the photoresist pattern as a mask and etching the third and second insulation layers using the etched hard mask and the photoresist pattern.

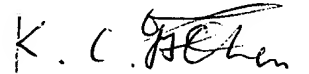

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Art Unit: 1765

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kin-Chan Chen whose telephone number is (703) 305-0222. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Benjamin Utech can be reached on (703) 308-3836. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2934.
